[GeoServer 2.18-RC Release Candidate](#)

Sep 8, 2020 · jgarnett

The GeoServer community is pleased to share the availability of [GeoServer 2.18-RC Release Candidate](#) for testing. Downloads are available ([zip](#) and [war](#)) along with [documentation](#) and more than 40 [extensions](#).

This is a GeoServer release candidate made in conjunction with GeoTools 24-RC and GeoWebCache 1.18-RC.

- Release candidates are a community building exercise and are not intended for production use.
- We ask the community (everyone: individuals, organizations, service providers) to download and thoroughly test this release candidate and report back.
- Participating in testing release candidates is a key expectation of our [open source social contract](#). We make an effort to thank each person who tests in our release announcement and project presentations!

We would like to thank everyone who contributed to this release. Jody Garnett (GeoCat) for this release candidate downloads and setting up the 2.18.x branch.

Release Candidate Testing Priorities

We would like to ask for your assistance testing the following:

- The number one testing priority is to try out GeoServer with your data! *Mass market open source thrives on having many people to review. Data driven open source like GeoServer thrives on exposure to many datasets.*
- The rest of this blog post highlights new features for GeoServer 2.17, please try out these features, read the documentation links, and ask questions.
